

Influence of Leadership Qualities of School Principals on their Leadership Potentials

Sailesh SHARMA

Leadership of School Principal can be better rated by teachers as teachers are the followers. This study explores the rating of leadership qualities and potentials of principals of reputed private schools in India by their teachers. Three hundred teachers from thirty reputed private schools participated in study. Questionnaire titled 'Attributes of My Principal' was used as research instrument. This questionnaire comprises of two sections one on leadership qualities and other on leadership potentials. The data will be analyzed using SPSS version 17 to compute Mean and Standard deviation to rate principals. Further the data will be subjected to find the correlation between dimensions of leadership qualities and leadership potential. This study will further try to identify the factors of leadership qualities which influence leadership potential conducting multiple regression analysis.

Key Words: Leadership qualities; Leadership potentials; Leadership
