

Innovative Ideas in Science Teaching: Theories and Exemplars

科學教學的革新意念--理論與範例

Table of Contents 目錄

Preface	<i>Yau Yuen YEUNG</i>	1
Words from Prominent Educators		
Adopting an innovative mindset to see the world around us	<i>King Chee PANG</i>	3
A paradigm shift in science learning and teaching	<i>Yin Cheong CHENG</i>	4
Science as story: Science education by story	<i>Peter FENSHAM</i>	11
Part I - Basic Research		
1. Teaching about science teaching and learning: research should inform practice	<i>John LOUGHRAN</i>	14
2. 物理實驗中創造性思維能力的培養與訓練 (Nurturing and training of creative thinking ability in physics experiments)	<i>李德安</i> (<i>Dean LI</i>)	25
3. The assessment of science learning in schools in Hong Kong: the status quo and future directions	<i>May Hung CHENG, Wing Mui SO & Wing Ming CHEUNG</i>	31
4. Curriculum change in science teaching: the need to listen to teachers	<i>Amanda BERRY & John LOUGHRAN</i>	46
5. 學習教授小學科學課題的起步點 - 教師教育課程 (A starting point of learning to teach science topics at the primary level - The teacher education programme)	<i>鄭美紅</i> (<i>May Hung CHENG</i>)	60
6. 由教授與學生對教與學觀感探討其學習觀 (Perceptions of teaching and learning in year one university Physics in Taiwan: Students' and professors' perspectives)	<i>張慧貞</i> (<i>Wheijen CHANG</i>)	73
Part II - Innovative Teaching Methods and Exemplars		
7. 透過科學專題研習促進小學生多元智能發展 (To facilitate the development of multiple intelligences among primary school pupils through science project)	<i>蘇詠梅、鄭美紅</i> (<i>Wing Mui SO & May Hung CHENG</i>)	82
8. 水波實驗 - 實驗短片 (Water wave experiments: video clips for demonstration)	<i>黃錫年</i> (<i>Shek Nin WONG</i>)	94

9. 在初中課堂上教授慣性和反作用力的一些力學實驗設計
(Experimental set-ups for teaching "inertia" and "reaction" in junior secondary science lessons) 蒙永強、陳萬德 100
(Wing Keung MUNG & Man Tak CHAN)
10. 生物學會如何輔助生物科教學
(How can the school Biology club support the learning of Biology: A list of stimulating activities) 黎麗明、黃德儀 106
(Lai Ming LAI & Tak Yee WONG)
11. 高一學生學習物理的心理障礙剖析
(Mental obstacle analysis about studying Physics in senior secondary school) 詹偉琴、喻晶 115
(Weiqin ZHAN & Jing YU)

Part III - IT Resources and Usages

12. Implications of data-logging on A.L. physics experiments: a preliminary study Pun Hon NG & Yau Yuen YEUNG 127
13. 信息技術在內地基礎教學中的應用簡介
(On the applications of IT in China's foundation education) 王笑君 136
(Xiaojun WANG)
14. 在中學推廣生物科技教育
(To promote biotechnology education in secondary schools) 陳城禮 141
(Sing Lai CHAN)
15. 便利科學教育用途之另類中文輸入法
(An alternative Chinese input method for Science education) 楊友源 147
(Yau Yuen YEUNG)
16. 資訊科技於物理教學上的應用
(How to teach and learn physics with information technology: some suggestions and sharing) 溫家傑 152
(Ka Kit WAN)

Part IV - Primary Science Curriculum

17. 綜合與分科--雙軌並行的科學課程模式
(Within disciplines and interdisciplinary - a dual model for developing science curriculum) 李揚津 159
(Yeung Chung LEE)
18. 台灣中小學科學教育演進簡史
(The development of primary and secondary science education in Taiwan) 熊召弟、陳嘉成 168
(Chao-Ti HSIUNG & Jia Cheng CHEN)
19. Integration: An approach to science in primary schooling Peter FENSHAM 175

Appendix

- About the CD-ROM 185
