Dr Felix Cheung
Assistant Professor
Department of Psychology
University of Toronto

Dr. Felix Cheung is the Canada Research Chair in Population Well-being. He uses large global datasets to study life satisfaction and develop evidence-based interventions and policies to promote well-being at scale.

“The Hong Kong Paradox”

The World Happiness Report identifies economic prosperity and longevity as two key predictors of happiness. Hong Kong enjoys world-leading longevity and one of the highest GDP per capita in the world. Therefore, there are many good reasons to expect Hong Kong to have some of the happiest people in the world. In this talk, I will place Hong Kong's well-being into a global context using international data from over 2,000,000 participants across 160 regions. The seminar will end with a discussion on how we can work together to improve Hong Kong's happiness.

Moderator

Dr Lau Esther Yuet Ying

Associate Professor

Department of Psychology

The Education University of Hong Kong
